## YD-0310S/D

Enhanced design for higher productivity, less downtime, and lighter environmental footprint.

Clamping force 30 - 100 tf

Vibration control

Optimized design + Power-saving

All-axis servo-driven

### All-Axis Servo Driven Take-out Robot Enhancing Customer Profitability and Environmental Measures

Combining design optimization, CFRPV3, and vibration control contribute to shorter cycle time and stable take-out. We have refined our unique ECO Vacuum™ technology to reduce compressed air consumption even further. As a result, robot air consumption can be economized and can reduce capital expenditures. The YD-0310 is sized for small molding machines with clamping forces from 30 to 100 tf.

### Equipped with E-touch compact 3 as standard

- Smart ECO Vacuum
- Take-out Diagnosis Function
- Torque Monitoring during Manual Operation

The E-touch compact 3 takes the easy operability of the previous YC series controller. And several assist features to become even easier to use.
